

Never Lose Track Again: Real-Time Inventory, Zero Downtime

Turn inventory into a competitive advantage with RFID

APPLIED AUTOMATION
**SMART INVENTORY
MANAGEMENT**

 **APPLIED**
Automation™

The Challenge

In industrial operations, lack of inventory control can cost thousands of dollars:

Stop wasting hours hunting for parts, find what you need instantly.

Eliminate costly line stoppages caused by missing parts.

End error-prone counts and replenishment delays.

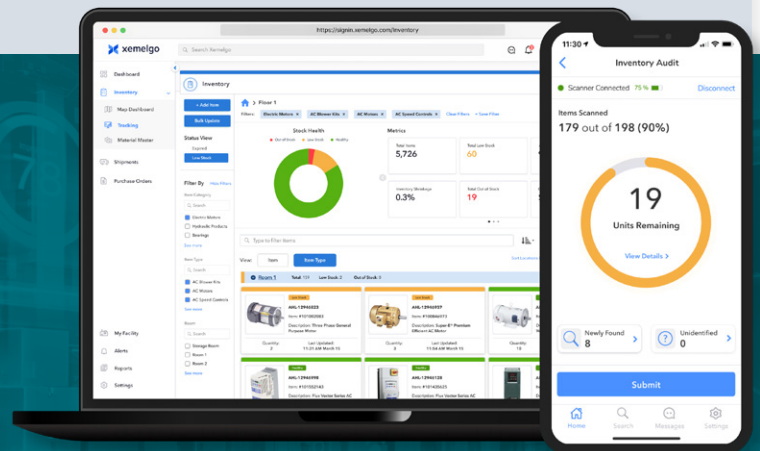

Say goodbye to lost parts, excess stock, and wasted capital.

Our Solution

With RFID Smart Inventory Management, every asset, spare part, and consumable is automatically tracked.

RFID tags and readers update the cloud in real-time, providing complete visibility and control of your inventory.

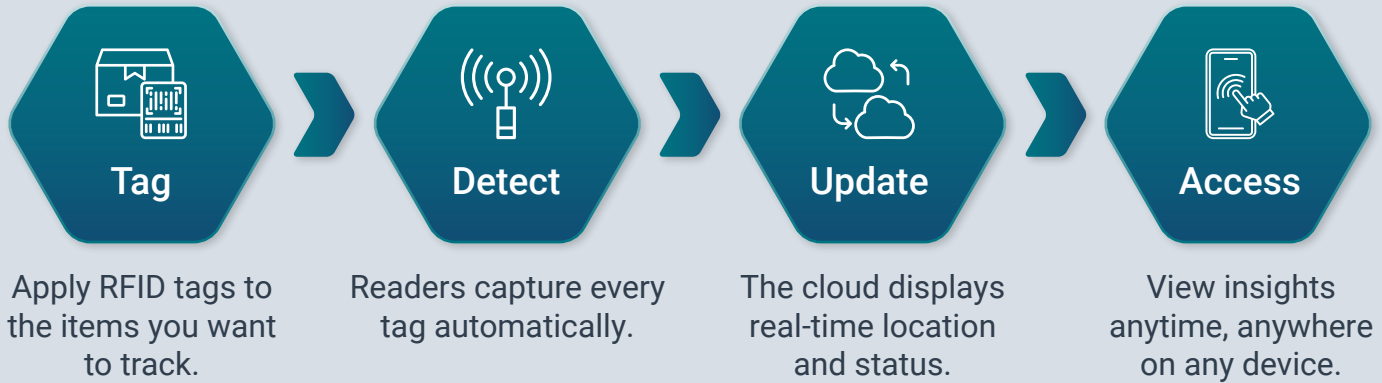

Always know what you have, where it is, and when you need it.

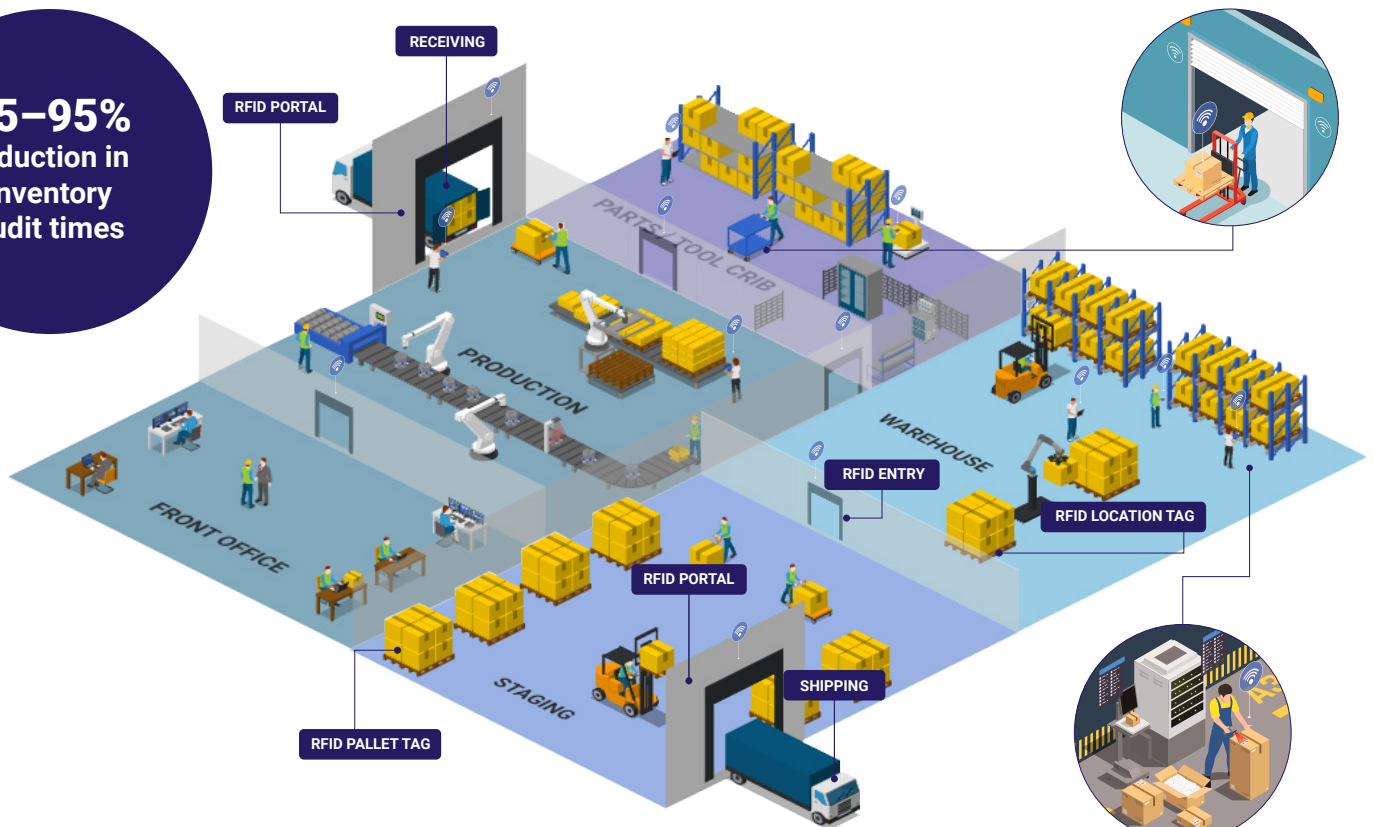

\$2.5M cost avoidance from validated labor savings

How It Works

Simple, Automated, Powerful:

85–95%
reduction in
inventory
audit times

Immediate Benefits

- ✓ Cycle counts in minutes, not hours.
- ✓ Track thousands of items in real time.
- ✓ Cut inventory losses by up to 90%.
- ✓ Save hundreds of labor hours every year.
- ✓ 24/7 visibility that pays for itself in months.

Grow your operations with Smart Inventory

Efficiency

No more downtime.
Automate tracking
End-to-End.

Control

Always know where
every part is.

Savings

Slash costs by
reducing waste &
stockouts.

Value

ROI you can
measure in months,
not years.

Use Cases

Manufacturing

Spare parts & MRO control.

Warehousing

Real-time, automated
inventory accuracy.

Production

Track work-in-process orders
with confidence.

OEM & Multi-Site Operations

End-to-end visibility
across multiple sites.

Proven Results

Companies adopting RFID Smart
Inventory Management report:

**Cycle Counts in minutes,
not hours.**

**Thousands of items tracked
in real time.**

**Lower costs by reducing
errors & losses.**

**Compliance simplified,
efficiency unlocked.**

\$2M excess inventory savings realized in just 3 months
